

Memorandum

To: Saddle Creek Home Owners
From: Heartland Dredging
Date: March 30, 2016
Subject: Dredging of Saddle Creek Retention Pond 11

The purpose of this letter is to inform you that Heartland Dredging will be dredging retention pond #11 starting on or about Monday April 4th. The work will take approximately 3 weeks and we anticipate completion by the end of April. The pond is located behind the homes at 14391 through 14433 Chariots Whisper Drive.

The process involves placing a small floating barge in the pond. The barge has an arm with an auger head and pump that will vacuum the muck from the bottom of the pond and pump it through a 6" pipeline to large dewatering bag located the common area near Towne Road (see attached aerial image).

The pipeline will need to be placed in the storm sewer easement between 14445 & 14439 Chariots Whisper Drive and 14444 & 14438 Chariots Whisper Drive. We will also be placing a pipe ramp that crosses Chariots Whisper Drive in this location. The pipe ramp will in effect be like an oversized speed bump and we will have proper warning devices in place and a permit with the City of Carmel.

If you have any questions or concerns, please do not hesitate to call us. We will be more than happy to meet with you at your convenience to offer any additional information you may need. We will be happy to answer any questions you may have.
